

Fiera Capital Diversified Alternatives Fund¹

Institutional Class (FCAIX)

OCTOBER 2017 COMMENTARY

The Fiera Capital Diversified Alternatives Fund (the “Fund”) returned 1.57% net of all fees and expenses for the month of October. Positive performance was driven by discretionary global macro and CTA strategies while equity market neutral partially offset these gains.

Since inception in July 2014, the Fund had a cumulative net return of 2.95%. During this time, it outperformed the HFRX Global Hedge Fund Index (1.53%) by 1.42% and underperformed the MSCI World Index (23.52%) by 20.57%.

¹ The Fiera Capital Diversified Alternatives Fund was formerly known as the Rothschild Larch Lane Alternatives Fund as of July 13, 2016. The Fund continues to be managed with the same investment approach and strategy.

² Please refer to Disclaimers for more information regarding Fees and Expenses.

Alternative investment strategies use a variety of complicated trading strategies. Not all strategies will be successful nor are such strategies suitable for all investors.

Fiera Capital Diversified Alternatives Fund

Institutional Class (FCAIX)

To determine if this Fund is an appropriate investment for you, carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and other information may be found in the Fund's summary and full prospectuses, which may be obtained by calling 844-755-3863 or by visiting the website at www.fierausa.com/investment-strategies/alternatives/altsfund. Please read the prospectus carefully before investing.

The Fiera Capital Diversified Alternatives Fund is distributed by SEI Investments Distribution Co, which is not affiliated with the adviser or any of its affiliates nor with any of the sub-advisers.

Fees and Expenses – Gross expense ratio represents the total expense ratio applicable to investors. The net expense ratio of the fund is: 3.01%; which includes fees waived and/or expenses reimbursed/recouped. Other expenses includes the remainder of other expenses and acquired fund fees & expenses. Fiera Capital Management Company LLC has contractually agreed to reduce fees and reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses after Fee Reductions and/or Expense Reimbursements (excluding any class-specific expenses, Dividend and Interest Expenses on Securities Sold Short, interest, taxes, brokerage commissions, Acquired Fund Fees and Expenses, and non-routine expenses) from exceeding 2.50% with respect to Investor Class shares and Institutional Class shares of the Fund's average daily net assets until February 28, 2018.

The MSCI World TR Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The HFRX Global Hedge Fund Index is designed to be representative of the overall composition of the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage. The strategies are asset weighted based on the distribution of assets in the hedge fund industry. The indexes discussed herein (the "indexes") are not subject to any of the fees or expenses to which the Fund would be subject. References to the indexes are for comparison or discussion purposes only and are not a projection, prediction or guarantee of performance. It should not be assumed that the Fund will invest in any specific securities that comprise any of the indexes. Indices are unmanaged and its returns do not reflect fees, expenses, or sales charges. One cannot invest directly in an index.

Investing involves risk, including possible loss of principal. The Fund invests in bonds. Bonds and bond funds are subject to interest rate risk and will decline in value as interest rates rise. The Fund uses investment techniques that are different from the risks ordinarily associated with equity investments and are considered complex trading strategies. Such techniques and strategies include the use of derivatives, short sales, leverage and investments in commodity-linked securities and foreign securities. Derivatives are often more volatile than other investments and may magnify the Fund's gains or losses. With short sales, the Fund risks paying more for a security than it received from its sale. Short sale losses are potentially unlimited and the expenses involved with the shorting strategy may negatively impact the performance of the Fund. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from social, economic, or political instability in other nations. Commodity linked securities can be more volatile and less liquid than the underlying commodities themselves and the use of leverage may accelerate the velocity of potential losses. These alternative investment strategies include risks in addition to those risks with direct investments in securities as described in the prospectus. Such strategies may not be suitable for all investors. The Fund uses a multi-manager structure. It is possible that the investment styles used by a Sub-Adviser in an asset class or investment strategy will not always be complementary to those used by others, which could adversely affect the performance of the Fund.
