Executive Chair of the Board

Candice Bangsund
CFA
Vice President and Portfolio Manager,
Global Asset Allocation and Private Markets

The fourth quarter got off to a strong start. Solid economic and corporate earnings results in the United States provided a tailwind for global stock markets – while a tentative trade truce between the United States and China added to the optimistic mood in the market. That helped to counteract macroeconomic headwinds such as the US government shutdown, a small-lived selloff in regional banks, and concerns about lofty equity market valuations.

FINANCIAL MARKET DASHBOARD				
	OCT. 31, 2025	MTD	YTD	1 YEAR
EQUITY MARKETS		% PRICE CHANGE (LC)

Gold (USD/oz)	3996.50	4.05%	51.33%	45.36%

Global equity markets marched higher in October. The S&P 500 extended its winning streak thanks to a healthy slate of corporate earnings. However, the monthly gain was driven by a narrow group of stocks, with the Magnificent Seven soaring higher as mania around AI continued to be a key source of upward momentum. By contrast, the equal-weighted S&P 500 declined in its first monthly loss since the tariff turmoil in April. Meanwhile, the S&P/TSX posted a more moderate gain as the latest pullback in gold stocks weighed. Elsewhere, the MSCI EAFE advanced, while the MSCI gauge of emerging market stocks led the global charge - driven by the artificial-intelligence boom and receding trade tensions between the United States and China.

Fixed income markets also generated positive results. Bond yields edged lower as traders braced for rate cuts from both the Federal Reserve and Bank of Canada. While indeed following through in late October, policymakers set a high bar for future reductions – which saw bond yields back-up towards month-end. Chair Powell said a rate cut in December is not a foregone conclusion (“in fact, far from it”) – while Governor Macklem stated that rates are now at “about the right level.” The Bloomberg US Aggregate Bond Index rose 0.6%, while the FTSE Canada Bond Universe gained 0.7%.

The US dollar strengthened to a three-month high after some Federal Reserve officials pushed back on calls for another rate cut at the December gathering. That saw the yen, euro, pound, and Canadian Dollar all weaken against the greenback last month.

Finally, oil retreated as investors focused on a lingering supply glut and the prospect for OPEC+ to add additional barrels to the market. While the relentless run in gold prices continued last month, bullion lost some momentum as expectations for fewer Federal Reserve rate cuts weighed on the non-interest-bearing metal. Copper hit a record amid easing in US-China trade tensions, while mine-supply setbacks added to concerns about physical tightness in the market.

Economic Overview

Canada

Canadian inflation rose more than expected in September, with the average of the Bank of Canada's preferred gauges of underlying "core" inflation coming in at 3.15% y/y – above the target range of 1% to 3%. Still, as was widely expected, the Bank of Canada lowered interest rates by 25 basis-points to 2.25% in late October. However, the Bank offered forward guidance that suggests it will now stay on hold – with the Governing Council seeing the new policy rate as at "about the right level" to keep inflation at 2% while also helping the economy through a period of structural change stemming from the trade conflict. With rates at the bottom end of the estimated neutral range (2.25% - 3.25%), a pause is reasonable. Moreover, while trade represents a downside risk for the economy, the recently announced federal budget could represent an upside risk.

United States

While Federal Reserve officials pivoted their focus to the employment side of their dual mandate and resumed rate cuts this fall, inflation may be the bigger risk. Somewhat worrisome is that the disinflationary impulse in the United States has stalled out. While the core consumer price index (CPI) data for September was soft enough to support the decision to cut interest rates in October, the data wasn't exactly benign. The data showed the impacts of tariffs have pushed core goods price gains higher – while tariff inflation is likely to continue showing up in the data in the months ahead. Meanwhile, core services disinflation has paused. With tariffs expected to rise further over the coming months, still-elevated core services inflation may bring into question the ability for the Federal Reserve to pivot aggressively from its restrictive policy stance.

China

According to the official purchasing manager indices (PMI), China's factory activity slumped for the longest streak in more than nine years – prompting fresh calls for greater policy support. The details showed that new orders shrank the most since 2023 as demand took a hit from trade barriers and weak sentiment at home, while the output sub-index fell below the 50-mark that divides expansion from contraction for the first time since April when Trump unleashed his Liberation Day tariffs. Not surprisingly, the new export order sub-index also recorded its worst reading since then. While manufacturers will likely find relief from the deal reached between President Trump and Chinese President Xi Jinping that has reduced tariffs on made-in-China products, weak domestic demand and ongoing uncertainties in US-China relations are likely to continue casting a shadow over the outlook.

Economic Scenarios

Main Scenario | Stagflation

Probability 40 %

In this high probability scenario, sweeping tariffs across a wide ranging group of trading partners threatens to hobble global growth and push up prices for consumers and businesses. While the full magnitude of tariffs announced by President Trump prove to be less than initially thought, the effective tariff rate in the United States rises to its highest level in nearly a century. From a growth perspective, the damage has likely been done, with the deterioration in sentiment stemming from uncertain trade dynamics curtailing economic activity. While households rein-in spending given the prospect for higher prices and concerns about their financial situations, lingering business angst manifests itself into weaker investment and hiring plans. On the inflation front, recent levies add to the global inflationary impulse. That keeps inflation firmly above central banks' targets at a time when the last mile back to 2% is proving a challenge. Given that long-term inflation expectations remain well-anchored, central banks are able to prioritize supporting the ailing economy and resume monetary policy easing - though not to overly-stimulative levels that risk reigniting price pressures.

Scenario 2 | Soft Landing

Probability 25 %

The consensus view for the coming 12-18 months remains one of a "soft landing" – a so-called "goldilocks" scenario of healthy, trend-like growth, moderating pricing pressures towards the 2% target, and multiple rate cuts from central banks. Despite the fact that United States trade policy is far from settled, investors appear comfortable in the view that growth will cool just enough to prompt Federal Reserve easing but without tipping the world's largest economy into an outright recession.

Scenario 3 | Recession

Probability 20 %

In this worst-case scenario, the comprehensive and punitive tariff announcements from President Trump remain firmly in place for an extended period of time. A full-blown trade war ensues and permeates across the globe, with sweeping tariffs and retaliatory measures amplifying the upside risks to inflation while raising the risk of recession. With long-term inflation expectations reasonably anchored, growth headwinds outweigh the inflationary impulse and central banks step-in to provide support – though the specter of tariff-induced inflation limits the ability of central banks to ease monetary policy in a meaningful way.

Scenario 4 | Policy Error

Probability 15 %

There's a risk the Federal Reserve may be running ahead of itself in attaining its dual mandate of full employment and price stability. Aside from the effects of tariffs that have already come into place, inflation is not convincingly on track to return to the 2% target – particularly given sticky services prices. Meanwhile, demand remains resilient and well-above its trend level (positive output gap). And while the labor market is showing some signs of deterioration, not all of that weakness represents economic slack that less-restrictive monetary policy can ameliorate. Indeed, that softness has been stemming from the supply-side of the economy (versus demand) – with President Trump's immigration and trade policies creating both labor shortages and uncertainty for businesses. As such, there may be limited room to make aggressive rate cuts without inadvertently moving to an inappropriately accommodative monetary policy stance.

Discussions regarding potential future events and their impact on the markets are based solely on historical information and Fiera Capital's estimates and/or opinions, and are provided for illustrative purposes only. General Market projections are hypothetical estimates of long-term returns of economic asset classes based on statistical models and do not represent the returns of an actual investment. Actual results could vary substantially. Models have limitations and may not be relied upon to make predictions of future performance of any account. Past performance is not a guarantee of future results. Inherent in any investment is the potential for loss.

Important Disclosure

Fiera Capital Corporation ("**Fiera Capital**") is a global independent asset management firm that delivers customized multi-asset solutions across public and private classes to institutional, financial intermediary and private wealth clients across North America, Europe and key markets in Asia and the Middle East. Fiera Capital trades under the ticker FSZ on the Toronto Stock Exchange. Fiera Capital does not provide investment advice to U.S. clients or offer investment advisory services in the US. In the US, asset management services are provided by Fiera Capital's affiliates who are investment advisers that are registered with the U.S. Securities and Exchange Commission (the "SEC") or exempt from registration. Registration with the SEC does not imply a certain level of skill or training. Each affiliated entity (each an "**Affiliate**") of Fiera Capital only provides investment advisory or investment management services or offers investment funds in the jurisdictions where the Affiliate and/or the relevant product is registered or authorized to provide services pursuant to an exemption from registration.

This document is strictly confidential and for discussion purposes only. Its contents must not be disclosed or redistributed directly or indirectly, to any party other than the person to whom it has been delivered and that person's professional advisers.

The information presented in this document, in whole or in part, is not investment, tax, legal or other advice, nor does it consider the investment objectives or financial circumstances of any investor. The source of all information is Fiera Capital unless otherwise stated.

Fiera Capital and its Affiliates reasonably believe that this document contains accurate information as at the date of publication; however, no representation is made that the information is accurate or complete and it may not be relied upon. Fiera Capital and its Affiliates will accept no liability arising from the use of this document.

Fiera Capital and its Affiliates do not make recommendations to buy or sell securities or investments in marketing materials. Dealing and/or advising services are only offered to qualified investors pursuant to applicable securities laws in each jurisdiction.

Past performance of any fund, strategy or investment is not an indication or guarantee of future results. Performance information assumes the reinvestment of all investment income and distributions and does not account for any fees or income taxes paid by the investor. All investments have the potential for loss. Target returns are forward-looking, do not represent actual performance, there is no guarantee that such performance will be achieved, and actual results may vary substantially.

This document may contain "forward-looking statements" which reflect the current expectations of Fiera Capital and/or its Affiliates. These statements reflect current beliefs, expectations and assumptions with respect to future events and are based on information currently available. Although based upon what Fiera Capital and its affiliates believe to be reasonable assumptions, there is no guarantee that actual results, performance, or achievements will be consistent with these forward-looking statements. There is no obligation for Fiera Capital and/or its Affiliates to update or alter any forward-looking statements, whether as a result of new information, future events or otherwise.

Strategy data such as ratios and other measures which may be presented herein are for reference only and may be used by prospective investors to evaluate and compare the strategy. Other metrics are available and

should be considered prior to investment as those provided herein are the subjective choice of the manager. The weighting of such subjective factors in a different manner would likely lead to different conclusions.

Strategy details, including holdings and exposure data, as well as other characteristics, are as of the date noted and subject to change. Specific holdings identified are not representative of all holdings and it should not be assumed that the holdings identified were or will be profitable.

Certain fund or strategy performance and characteristics may be compared with those of well-known and widely recognized indices. Holdings may differ significantly from the securities that comprise the representative index. It is not possible to invest directly in an index. Investors pursuing a strategy like an index may experience higher or lower returns and will bear the cost of fees and expenses that will reduce returns, whereas an index does not. Generally, an index that is used to compare performance of a fund or strategy, as applicable, is the closest aligned regarding composition, volatility, or other factors.

Every investment is subject to various risks and such risks should be carefully considered by prospective investors before they make any investment decision. No investment strategy or risk management technique can guarantee returns or eliminate risk in every market environment. Each investor should read all related constating documents and/or consult their own advisors as to legal, tax, accounting, regulatory, and related matters prior to making an investment.

The ESG or impact goals, commitments, incentives and initiatives outlined in this document are purely voluntary, may have limited impact on investment decisions and/or the management of investments and do not constitute a guarantee, promise or commitment regarding actual or potential positive impacts or outcomes associated with investments made by funds managed by the firm. The firm has established, and may in the future establish, certain ESG or impact goals, commitments, incentives and initiatives, including but not limited to those relating to diversity, equity and inclusion and greenhouse gas emissions reductions. Any ESG or impact goals, commitments, incentives and initiatives referenced in any information, reporting or disclosures published by the firm are not being promoted and do not bind any investment decisions made in respect of, or stewardship of, any funds managed by the firm for the purposes of Article 8 of Regulation (EU) 2019/2088 on sustainability-related disclosures, in the financial services sector. Any measures implemented in respect of such ESG or impact goals, commitments, incentives and initiatives may not be immediately applicable to the investments of any funds managed by the firm and any implementation can be overridden or ignored at the sole discretion of the firm. There can be no assurance that ESG policies and procedures as described herein, including policies and procedures related to responsible investment or the application of ESG-related criteria or reviews to the investment process will continue; such policies and procedures could change, even materially, or may not be applied to a particular investment.

The following risks may be inherent in the funds and strategies mentioned on these pages.

Equity risk: the value of stock may decline rapidly and can remain low indefinitely. **Market risk:** the market value of a security may move up or down based upon a change in market or economic conditions.

Liquidity risk: the strategy may be unable to find a buyer for its investments when it seeks to sell them. **General risk:** any investment

that has the possibility for profits also has the possibility of losses, including loss of principal. **ESG and Sustainability risk** may result in a material negative impact on the value of an investment and performance of the portfolio. **Geographic concentration risk** may result in performance being more strongly affected by any conditions affecting those countries or regions in which the portfolio's assets are concentrated. **Investment portfolio risk**: investing in portfolios involves certain risks an investor would not face if investing in markets directly. **Currency risk**: returns may increase or decrease as a result of currency fluctuations. **Operational risk** may cause losses as a result of incidents caused by people, systems, and/or processes. **Projections and Market Conditions**: We may rely upon projections developed by the investment manager or a portfolio entity concerning a portfolio investment's future performance. Projections are inherently subject to uncertainty and factors beyond the control of the manager and the portfolio entity. **Regulation**: The manager's operations may be subject to extensive general and industry specific laws and regulations. Private strategies are not subject to the same regulatory requirements as registered strategies. **No Market**: The LP Units are being sold on a private placement basis in reliance on exemptions from prospectus and registration requirements of applicable securities laws and are subject to restrictions on transfer thereunder. Please refer to the Confidential Private Placement Memorandum for additional information on the risks inherent in the funds and strategies mentioned herein. **Meteorological and Force Majeure Events Risk**: Certain infrastructure assets are dependent on meteorological and atmospheric conditions or may be subject to catastrophic events and other events of force majeure. **Weather**: Weather represents a significant operating risk affecting the agriculture and forestry industry. **Commodity prices**: Cash flow and operating results of the strategy are highly dependent on agricultural commodity prices which can be expected to fluctuate significantly over time. **Water**: Water is of primary importance to agricultural production. **Third Party Risk**: The financial returns may be adversely affected by the reliance on third party partners or a counterparty's default.

For further risks we refer to the relevant fund prospectus.
